DISPATCH

VIA : AIR

TO : Acting Chief, []

FROM : Chief, FE

SUBJECT: General - Administrative/Logistics
Specific - Shipment of Household Goods; Policy for Payment Thereof

REFERENCE: a. [], dated 17 March 1959

b. DIR - 37309

1. The referenced dispatch (a) referred to policy for charges assessed on excess weight of return shipments of household goods. Reference "a" propounds the question "Are excess charges, if any, prorated against storage or against shipping costs, or possibly, both?"
2. Return shipments of employee's household effects from certain points in the [] Area to CONUS are made exclusively by [] and accordingly are subject to regulations which permit return shipments not in excess of 8,750 pounds when such cover is utilized. The fact that household effects of such weight may be shipped, however, does not imply that the shipment is entirely at [] expense. In determining the weight of the return shipment which will be transported at [] expense, consideration is given to the weight allowance of household effects assigned to the GS grade of the employee, as set forth in paragraph 10c of [], and the weight of effects placed in storage when the employee was assigned PCS overseas subject to the 40% deduction as set forth in paragraph 11d of []. Consequently, when the weight of the return shipment, plus the weight of the household effects stored at [] expense, exceeds the weight limitation for the GS grade of the employee, the latter is liable for the transportation cost on the excess weight of the return shipment.
3. Application of the foregoing and the computation of the excess weight for which the employee shall bear transportation costs, is illustrated below:

D-R-A-F-T

~~SECRET~~

CONFIDENTIAL

CONFIDENTIAL**SECRET**DRAFTHypothetical Facts:Pounds

1. Gross weight allowed GS-12 employee under
10s of 13,500
2. Actual net weight of effects stored in
CONUS 5,000
3. Gross weight of return shipment 8,000

Computation of Excess Weight:

Based upon the above hypothetical facts, the determination of excess over weight limitation is calculated as follows:

1. Weight of return shipment (3 above) 8,000
2. Net weight of effects stored (2 above) 5,000
3. Convert item 2 to gross weight of effects
by adding allowance for weight of packing
material 5000 \cdot 60% 8,333
4. Total 1 plus 3 16,333
5. Gross weight allowed GS-12 employee
(1 above) 13,500
6. Excess weight to CONUS to be borne by
employee at applicable transshipping
rates 2,833

4. No adjustment or credit with respect to storage charges may be applied in calculating the employee's liability for excess shipping costs even though the weight of household effects stored in CONUS at expense plus the weight of the effects shipped when the employee departed to the was less than the maximum assigned to the applicable GS grade.
5. Further examples setting forth the computation of excess weight to be borne by the employee are illustrated on the attachment.

assigned PCS overseas subject to the 40% deduction as set forth in paragraph 11d of [] Consequently, when the weight of the return shipment, plus the weight of the household effects stored at [] expense, exceeds the weight limitation for the GS grade of the employee, the latter is liable for the transportation cost on the excess weight of the return shipment.

3. Application of the foregoing and the computation of the excess weight for which the employee shall bear transportation costs, is illustrated below:

Hypothetical Facts:Pounds

- | | |
|---------------------------------------------------------|--------|
| 1. Gross weight allowed GS-12 employee under 10c of [] | 13,500 |
| 2. Actual net weight of effects stored in CONUS | 5,000 |
| 3. Gross weight of return shipment | 8,000 |

Computation of Excess Weight:

Based upon the above hypothetical facts, the determination of excess over weight limitation is calculated as follows:

- | | |
|---------------------------------------------------------------------------------------------------------------------|--------|
| 1. Weight of return shipment (3 above) | 8,000 |
| 2. Net weight of effects stored (2 above) | 5,000 |
| 3. Convert item 2 to gross weight of effects by adding allowance for weight of packing material $5000 \times .60\%$ | 8,333 |
| 4. Total 1 plus 4 | 16,333 |
| 5. Gross weight allowed GS-12 employee (1 above) | 13,500 |
| 6. Excess weight to CONUS to be borne by employee at applicable shipping rates | 2,833 |

~~SECRET~~

CONFIDENTIAL

~~SECRET~~

CONFIDENTIAL

4. No adjustment or credit with respect to storage charges may be applied in calculating the employee's liability for excess shipping costs even though the weight of household effects stored in CONUS at [] expense plus the weight of the effects shipped when the employee departed to the [] was less than the maximum assigned to the applicable GS grade.
5. Accordingly, it has been concluded as a matter of policy that the computation of the excess costs of return shipments shall be based on shipping rates rather than attempting to adjust storage rates in any instance when the weight of effects stored was less than the authorized limitation. In effect, the weight of effects placed in storage at the time of departure to a PCS overseas location represents the ceiling for payment of storage charges at [] expense and no retroactive adjustments shall be made in order to permit the return shipment at [] expense of increased weights of personal effects.
6. Further examples setting forth the computation of excess weight to be borne by the employee are illustrated on the attachment.
